- The Ravenstone Equity Trust's objective is to generate tax efficient real returns by compounding capital over the long term.
- While there are many ways to do that, we are firm believers in one of the oldest schools of thought: invest in a concentrated portfolio of exceptional companies with the mindset and behaviour of a long-term business owner.
- We employ a fundamental approach that seeks to identify leading companies in attractive industries with strong and sustainable competitive positions, high returns on capital, strong free cash flows and management teams that think and behave like owners.
- We expect the return on our investment to be driven predominantly by:
 - > The underlying cash flows generated by the businesses we own, and
 - > The price we pay to acquire the shares of those businesses.
